

CONEY ISLAND CREEK

NOTES:

HOMEWORK:

Write a 3-5 page paper on one of the three prompts below.

- Research: one local wreck. Make sure to include all of its history previous to its last voyage. Why is it important to document wrecks?

- Research: at least three types of tools that can be used to survey, document and recover wrecks. What are the benefits and downfalls of each tool/technique? What works best for deep water vs. shallow water? Which tool do you think is most effective for its price? Why?

- Creative: Choose an unidentified wreck in the creek and write a story (journal entry, newspaper article, ship's log) on a story of the ship's life + wreck. Who was aboard? Why were they there? Please do research and make it a feasible tale.
